1. INTRODUCTION

Sauce Labs demo is a dummy ecommerce website which provides various features that an ecommerce website has to offer.

It has a login page, provides users various products to purchase.

User get the features to add the product to cart, checkout the added product, remove from added product, filter the products etc. It also has a payment gateway that needs to be verified.

Objective

To verify that the Sauce Demo website is functional and meets the requirements of the users

Scope of Testing

The test scope of this website will include :

- Testing of the Home page
- Testing of Login page
- Testing of Inventory page
- Testing of checkout page

Test Approach

The overall testing of the website will be done manually using black-box testing technique.

I will browse through the website, explore the products, add some of them to the cart and then checkout.

I will also validate the login page by filling the details correctly as well as incorrectly.

Requirements

1. A computer with minimum 4 GB of RAM.
2. A hard drive.
3. A web browser such as Chrome, Firefox, or Edge.

Test Environment

- Windows 10 – Chrome, Firefox and Edge
- Mac OS – Safari Browser
- Android Mobile OS – Chrome
- iPhone Mobile OS - Safari

Inclusions

- Login
- Logout
- Navigation
- Product Information
- Cart
- Filter
- Checkout
- Order Confirmation

Exclusions

- Performance
- Security

- Contact
- Account Management

Conclusion

The test plan document has outlined the testing approach for sauce labs demo ecommerce website.

After performing the mentioned test strategies, the final product will be assured of good quality.
